

Rocky Mountain House Landfill

CCS LANDFILL SERVICES

PLANT PROFILE

Hours of Operation	7:30am to 6:00pm daily
Location (LSD)	SE 1/4-12-040-09W5
Directions to Facility	The landfill is located 18 km west of Rocky Mountain House on Hwy 11, then 1 km north. Watch for sign on Hwy 11
Mailing Address	P.O. Box 1824, Rocky Mountain House, AB T4T 1B4
Phone	(403) 845-7894
Fax	(403) 845-7896
Area Sales and Marketing	(403) 621-1283
Class and Approval	Class II Oilfield Landfill
Permit Number	AENV Approval No. 10052-01-00
LF Design	An Engineered Class II Landfill featuring a composite liner comprised of a Geosynthetic liner covered by a 60 mil high density polyethylene (HDPE) geomembrane liner along with a leachate collection system. Combined permeability of both liners exceeds regulatory requirements. Cell construction is subject to a strict QA/QC Program managed by third party professional engineering consultants
Groundwater Monitoring	A ground water monitoring program is in place with onsite monitoring wells located both up-gradient and down-gradient of the landfill cells. Sampling occurs twice a year with analysis compared to background analysis and past groundwater sampling events. Analytical reports are available for viewing at the site. Results are submitted annually to the appropriate regulatory authority
Surface Water Controls	Surface water is managed to prevent clean surface water from entering the landfill. Any water inside the landfill is contained and collected as leachate
Waste Acceptance Protocol	The Waste Approval Application (WAA) is submitted along with appropriate third party accredited lab analytical attached. The waste stream is approved for disposal by the landfill and an approval number is issued. The first load from every approval location is tested along with random sampling of waste streams entering the facility. Testing parameters include parameters used to approve the waste stream
Waste Placement	Facility utilizes a three dimensional alpha numeric grid locating system with surveyed elevations. Documentation is maintained showing the location of each load
Waste Tracking Documentation	Every load of waste coming to the site must be accompanied by a CCS Non Hazardous Waste Docket, complete with approval number. This waste docket serves as a certificate of transportation and disposal

PLANT PROFILE

Plant Biography

Plant #23 Rocky Mountain House was acquired by CCS on November 1999. With the addition of new and better equipment and extra operators, the facility is able to keep customer service at a high level. The busiest day for waste showed a total of 150 trucks unloading in the cells during an 11 hour day. In conjunction with the Rocky Waste Authority CCS offers alternative disposal options in MSW applications. Access to CCS Rocky Mountain House facility is not subject to seasonal load restrictions
